SAIL NUMBERS OF RACING YACHTS

NOTES ON THE RACING YACHT SECTION

The Section of the Register dealing with Racing Yachts is designed to serve two main purposes :—

1. To list under the several Countries, yachts of the International, National and Ocean Racing Classes;
2. To provide in Part II a list of yachts, too small for inclusion in the main body of the Register, but which are governed by the International and National Authorities.

It will be seen, therefore, that Part II of the Racing Yacht Section goes some considerable way towards meeting the problem of listing small boats in the Register.

Identification of Racing Yachts

In accordance with Racing Rule No. 25 of The International Yacht Racing Union yachts must identify themselves as follows:—

International Classes

All yachts of these classes shall bear on both sides of the mainsail:—

(*a*) A number or emblem showing the class to which the yacht belongs;

(*b*) A letter showing the nationality;

(*c*) The number of the yacht in the particular class.

Sail Numbers only shall be placed on both sides of the spinnaker.

The following letters, indicating nationality, have been assigned by the International Yacht Racing Union.

A	Argentine
AL	Algeria
AR	United Arab Republic
B	Belgium
BA	Bahamas
BL	Brazil
BU	Bulgaria
CA	Cambodia

R.Y.A. Handicap Classes

The R.Y.A. Handicap Classes were assigned the numbers 1 to 99. The first 99 numbers having been exhausted, a second series of 1 to 99 was assigned, and subsequently a third series with a letter "Y" added was employed, thus:

1 Y, 2 Y, etc.

(*See List of Yachts on pages* 852—854.)

Ocean Racing Classes

The United Kingdom Ocean Racing Class numbers are assigned by The Royal Ocean Racing Club. They run from 100 to 499; 601 to 699; 751 to 899; 1000 to 1199; 1700 to 1999 & 2100 to 2400.

International Classes

It is hoped that the above information used in conjunction with the Register itself, will facilitate the identification of yachts and at the same time be of interest to yachtsmen. It must be added, however, that the Editor of the Register has to depend upon the co-operation of the various National Authorities in making this Section as complete and up to date as possible.

SAIL NUMBERS OF RACING YACHTS

The following lists of Sail Numbers of Racing Yachts holding certificates of Rating are furnished by the National Authorities

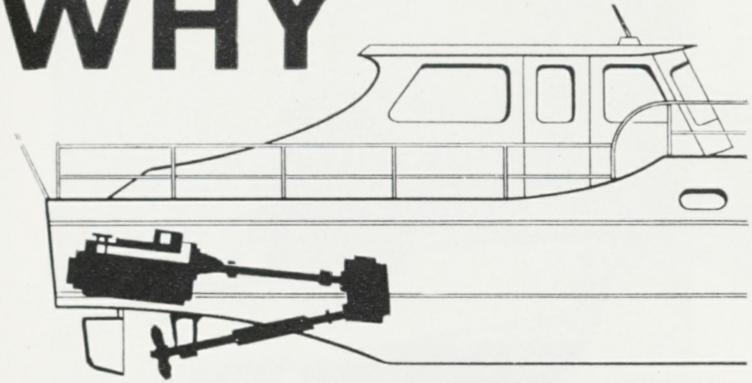
WHY



ENV-DRIVE?

ENV-DRIVE gives you all the benefits of aft-mounted engines—more cabin space amidships, less noise and smell, greater accessibility. It also offers you these advantages over other systems: Normal, sea-kindly hull designs can be used . . . Free choice of conventional engines—petrol or diesel—on proper engine bearers . . . Normal stern gear is used . . . propeller efficiency is greater . . . choice of reduction gears at no extra cost.

For information on ENV-DRIVE for engines up to 125 s.h.p., write to

...with **CIBA** glues

No longer is the life of a hull dictated by the fastenings: synthetic resin glues have put an end to that. An all-glued boat is inherently free from nail sickness and modern glues have made possible constructional techniques that eliminate caulking and other periodical chores. CIBA glues withstand water, damp, drying-out, insect attack, bacterial action and the many other causes of deterioration leading to joint failure. These glues have been proved in countless boats in use all over the world—from the polar ice cap to the tropics.

Further information on CIBA glues for boatbuilding will be sent gladly on request.

AEROLITE 300 and 306

For wood hulls and wood fittings of every type. Gap-filling and used cold. Aerolite 300 in liquid form for the boat-builder. Aerolite 306 in powder form for amateur and small scale use, including repairs.

AERODUX 185 and 500

Resorcinol glues conforming to BS 1204 type WBP. Also particularly suitable for constructing laminated structural members.

ARALDITE

The epoxy resin for bonding materials of similar and dissimilar nature that cannot be joined by other methods. Widely used for bonding components of reinforced glass fibre hulls and superstructures.

Aerolite, Aerodux and Araldite are registered trademarks.

Aerolite and Aerodux are accepted by Lloyds Register of Shipping for gluing wood constructional members in classed yachts.
